

Retort Pouches – 2011 to 2015

Section I:

Introduction

- A. Retort pouch
- B. Study organization
- C. Geographic regions
- D. Methodology and organization
- E. Conventions

Section II:

Executive Summary

- A. Technology
 - 1. Innovations
 - 2. Competition
- B. Economic and environmental impact
 - 1. Economic impact
 - 2. Environmental impact
- C. Market forces
 - 1. Competition
 - 2. Consumer attitudes
 - 3. Supply chain experience
 - 4. Product quality
 - 5. Shelf stability
 - 6. User convenience and time savings
 - 7. Product safety
 - 8. Economics
- D. Market statistics and projections
 - 1. Global market
 - 2. Pet food
 - 3. Food
 - 4. Geographic regions
 - 5. Aluminum foil versus transparent barrier materials
 - 6. Institutional versus retail consumption

Section III:

Technology

- A. History
- B. Ramifications of retorting
- C. Contract Packaging
- D. Pouch design
 - 1. Pouch structures
 - 2. Pouch features
 - 3. Folding carton and retort pouch combination
 - 4. Barrier materials
 - 5. Seal layer materials
 - 6. Other structural layer materials
 - 7. Inks and adhesives
 - 8. Suppliers of retort pouches
- E. Competitive response
- F. Equipment
 - 1. Laminators
 - 2. Pouch machines
 - 3. Fill/sealers
 - 4. Thermoform/fill/seal
 - 5. Horizontal form/fill/seal (h/f/f/s)
 - 6. Vertical form/fill/seal (v/f/f/s)
 - 7. Sterilization equipment
 - 8. Pouch handling
- G. Pouch testing
 - 1. Seal strength
 - 2. Leak resistance
 - 3. Lamination strength
 - 4. Barrier property testing

Section IV:

Economic and Environmental Impact

- A. Case 1: Retort pouch manufacturing
 - 1. Assumptions
 - 2. Economic results
- B. Case 2: Aluminum can manufacturing
 - 1. Assumptions
 - 2. Economic results
- C. Case 3: Polymer tray manufacturing

1. Assumptions
2. Economic results
- D. Case 4: Comparison of Case 1, Case 2, and Case 3
 1. Total Cost
 2. Material cost
 3. Labor cost
 4. Transportation cost
 5. Plant margin and prices
- E. Case 5: Retort pouch filling
 1. Assumptions
 2. Economic results
- F. Case 6: Aluminum can filling
 1. Assumptions
 2. Economic results
- G. Case 7: Polymer tray filling
 1. Assumptions
 2. Economic results
- H. Case 8: Comparison of Case 5, Case 6, and Case 7
 1. Total cost
 2. Material cost
 3. Labor cost
 4. Transportation cost
 5. Plant margin and prices
- I. Case 9: Retort pouch LCA
 1. Energy
 2. Greenhouse gas releases
 3. End of life
- J. Case 10: Aluminum can LCA
 1. Energy
 2. Greenhouse gas releases
 3. End of life
- K. Case 11: Polymer Tray LCA
 1. Energy
 2. Greenhouse gas releases
 3. End of life
- L. Case 12: Comparison of Case 9, Case 10, and Case 11
 1. Energy
 2. Greenhouse gas releases
 3. End of life

Section V:

Market Trends/Projections

- A. Applications
- B. Drivers and trends
 - 1. Consumer trends
 - 2. Supply chain capabilities
 - 3. Customized application technology
 - 4. Product quality
 - 5. Reduced heat exposure
 - 6. Shelf stability
 - 7. User convenience and time savings
 - 8. Product safety
 - 9. Economics
 - 10. Environmental impact
 - 11. Competitive response
 - 12. Infrastructure
 - 13. Differentiation
- C. Global market volume
- D. Global market value
- E. Volume for pet food segmented by end-use
- F. Volume for food segmented by end-use
 - 1. Sauces and related
 - 2. Cooked rice and related
 - 3. Tuna, salmon, and other seafood
 - 4. Soup, chili, and stew
 - 5. Vegetables
 - 6. Meals Ready to Eat (MRE)
 - 7. Nutraceuticals
 - 8. Baby food
 - 9. Meat and poultry
 - 10. Other
- G. Volume for pet food segmented by geographic region
- H. Volume for food segmented by geographic region
- I. Global volume segmented by geographic region
 - 1. Europe
 - 2. North America
 - 3. Japan
 - 4. BRIC
 - 5. Rest of world (ROW)
- J. Global value segmented by geographic region
- K. Volume in North America segmented by end-use

1. Food
2. Pet food
- L. Volume in Europe segmented by end-use
 1. Food
 2. Pet food
- M. Volume in Japan by segmented end-use
 1. Food
 2. Pet food
- N. Volume in BRIC by segmented end-use
 1. Food
 2. Pet food
- O. Volume in ROW segmented by end-use
 1. Food
 2. Pet food
- P. Global volume segmented by institutional and retail use
- Q. Global volume segmented by pouch design
- R. Global volume segmented by barrier material
 1. Aluminum foil
 2. Transparent barrier films
 3. Projection
- S. Global volume segmented by package structure
 1. Four-layer lamination
 2. Three-layer lamination
 3. Coextrusion
 4. Other
 5. Projection
- T. Global volume segmented by fitment usage
- U. Global volume segmented by reclosable zipper usage
- V. Global volume segmented by filling process
 1. Fill/seal
 2. Thermoform/fill/seal (t/f/f/s)
 3. Horizontal form/fill/seal (h/f/f/s)
 4. Vertical form/fill/seal (v/f/f/s)
 5. Projection
- W. Retort pouch market – printed versus unprinted
 1. Printed pouches
 2. Unprinted pouches
 3. Projection

Section VI:

Producer Profiles

**Section VII:
Supplier Profiles**

**Section VIII:
Contract Packagers**

**Section IX:
Glossary**

Tables: 47
