

# Pharmaceutical Packaging

## Global Markets, Technologies, and Opportunities

**Pharmaceutical Packaging 2007 - 2011** is a global study of the pharmaceutical packaging industry. This 448 page study examines the markets, technologies, and opportunities in pharmaceutical packaging. "Pharmaceutical Packaging" examines key drivers around the world including the impacts on global drug packaging from:

- global governmental policies on drug pricing
- global governmental policies on drug subsidies
- response to drug counterfeiting
- effectiveness of anti-counterfeit solutions
- governmental policies on intellectual property protection
- drug development
- consumer demands
- geographic influences
- governmental regulations
- packaging innovations

### Market Section

The Market Section includes an analysis of the drivers and trends for the drug industry, the corresponding analysis of the drivers and trends for pharmaceutical packaging, the current statistics of the global pharmaceutical packaging market, and quantitative projections and supporting discussion of the market through 2011. The Market Section provides quantitative forecasts and analyses for 12 different segmentations:

- drug delivery method into the body
- primary package type
- secondary package type
- packaging materials used
- geographic region
- drug regulatory status
- drug production process
- sales distribution channel
- patient compliance features
- anti-counterfeiting features
- child-resistance features
- tamper-evidence features

## Expand your Network

The profile sections characterize the pharmaceutical packaging supply chain, with detailed profiles on:

- equipment suppliers
- packaging producers

The study provides the top suppliers for each of the packaging types used for pharmaceutical packaging and ranks them by revenue.

## Allied Development Studies

**Pharmaceutical Packaging** was researched, written, and published by Allied Development Corp., of Burnsville, Minnesota U.S.A.

Other recent studies available from Allied Development Corp. include:

**Retort Pouches** - Global Markets, Opportunities, and Technologies - the definitive study of the global retort pouch industry, including technology, economics, and market analysis

**Microwaveable Packaging** - Technologies, Economics, and Markets - an in depth study of the North American Microwaveable packaging industry

**Stick Pouches** - Global Markets, Economics, and Technologies the first study dedicated to the stick pouch industry

**Stand-up Pouches** - Global Technologies, Markets, and Economics - an in depth study of stand-up pouches including volumes, trends, emerging competitive products, technologies, and economics

**Medical Device Packaging** - Global Technologies, Markets, and Economics - an in depth study of medical device packaging

**Barrier Films and Coatings** - Market Projections, Technologies, and Economics - a comprehensive global analysis of barrier materials used in flexible packaging

**Flexible Lidstock Packaging** - Markets and Technologies - a unique and in depth study of the NA flexible lidstock market

**Glass-coated Films** - Global Markets, Economics and Technologies - SiO<sub>x</sub>- and Al<sub>2</sub>O<sub>3</sub>-coated films for packaging

## Pharmaceutical Packaging Global Markets, Technologies, and Opportunities - 2007 to 2011

Learn about the technologies, markets and opportunities for both primary and secondary packaging.

### Primary:

- ampules
- blister packs
- bottles
- canisters
- cartridges
- closures
- intravenous (IV) bags
- mini-jars
- pouches
- pre-filled inhalers
- pre-filled syringes
- tubes
- vials
- innerseals
- closures

### Secondary:

- folding cartons
- blister cards
- wallets
- shrink bands
- labels

The study includes color pictures and illustrations to present concepts quickly and accurately.

Allied Development is a leading provider of economic analysis for the global packaging industry. Through years of packaging economic analysis we have developed a unique and powerful content knowledgebase in combination with a suite of software tools.

# Table of Contents

## Section I:

### Introduction

- A. Study purpose
- B. Pharmaceuticals defined
- C. Pharmaceutical packaging defined
- D. Study organization and methodology
  - 1. Methodology
  - 2. Organization
- E. Geographic regions
- F. Study deliverables
  - 1. Packaging manufacturers and converters
  - 2. Resin, additive, and component suppliers
  - 3. Equipment manufacturers
  - 4. Pharmaceutical producers, contract manufacturers and packagers

## Section II:

### Executive Summary

- A. Drivers and trends
  - 1. The human condition
  - 2. New drug requirements
  - 3. Over-the-counter (OTC) market
  - 4. Drug delivery methods
  - 5. Child resistance
  - 6. Anti-counterfeiting
  - 7. Tamper evidence
  - 8. Patient compliance
- B. Market projections
  - 1. Global market
  - 2. Geographic segmentation
  - 3. OTC versus prescription
  - 4. Child-resistant packaging
  - 5. Anti-counterfeit packaging
  - 6. Patient compliance
  - 7. Tamper evidence
  - 8. Package type
- C. Emerging technology
  - 1. Package
  - 2. Filling line technology

## Section III:

### Technology

- A. Technology drivers and trends
  - 1. Drug safety and efficacy
  - 2. Drug sensitivity
  - 3. Drug delivery method
  - 4. Regulations – drug safety and efficacy
  - 5. Packaging cost
  - 6. Environment and health
  - 7. Packaging requirements
- B. Primary packaging
  - 1. Ampules
  - 2. Blister packs
  - 3. Bottles
  - 4. Canisters
  - 5. Cartridges
  - 6. Intravenous (IV) bags
  - 7. Mini-jars
  - 8. Pouches and strip packs
  - 9. Pre-fillable inhalers
  - 10. Pre-fillable syringes
  - 11. Tubes
  - 12. Vials
  - 13. Other primary containers
  - 14. Innerseals
  - 15. Closures
- C. Secondary packaging
  - 1. Folding carton
  - 2. Blister cards and wallets
  - 3. Other
  - 4. Shrink bands and wraps
  - 5. Labels
- D. Compliance packaging
- E. Child-resistant packaging
  - 1. Multi-dose packaging
  - 2. Unit-dose packaging – non-recloseable
  - 3. Additional child-resistant technologies
- F. Tamper-evident packaging
- G. Unit-dose packaging
- H. Anti-counterfeit packaging
  - 1. Overt solutions
  - 2. Covert solutions

- 3. Summary
- I. Labelling
- J. Identification and tracking
  - 1. Bar codes
  - 2. Radio frequency identification (RFID)
- K. Active packaging
- L. Packaging processes for sterile drugs
  - 1. Traditional aseptic packaging.
  - 2. Aseptic packaging with barrier isolation technology
  - 3. Terminal sterilization (in-package)
- M. Packaging processes for non-sterile drugs
- N. Pharmaceutical packaging materials
  - 1. Polymers
  - 2. Glass
  - 3. Aluminum foil
  - 4. Paper
  - 5. Paperboard
  - 6. Other
- O. Packaging structures
  - 1. Blister pack structures
  - 2. Bottles, vials, ampules, cartridges, and mini-jars
  - 3. Pouch structures
  - 4. Pre-filled syringes
  - 5. IV bags
  - 6. Tube structures
  - 7. Secondary packaging
  - 8. Other structures
- P. Pharmaceutical packaging equipment technology
  - 1. Filling equipment
  - 2. Filling equipment suppliers

## Section IV:

### Market Trends and Projections

- A. Healthcare industry
- B. Pharmaceutical industry drivers and trends
  - 1. Government policies
  - 2. Aging population
  - 3. Markets in developing nations
  - 4. New drugs and technology
  - 5. Biologics
  - 6. Generic drugs
- C. Pharmaceutical packaging drivers and trends
  - 1. Underlying product demand
  - 2. Regulatory environment
  - 3. Government programs
  - 4. Product differentiation
  - 5. Drug Safety
  - 6. Conversions from prescription to OTC
  - 7. Patient compliance
  - 8. Unit dose
  - 9. Alternative drug delivery methods
  - 10. Consumer habits/preferences
  - 11. Automation
  - 12. Environmental
  - 13. Drug protection requirements
- D. Pharmaceutical packaging segmented by delivery method
  - 1. Oral delivery
  - 2. Inhaled
  - 3. Parenteral
  - 4. Transdermal
  - 5. Cutaneous
  - 6. Ocular
  - 7. Nasal
  - 8. Other
  - 9. Forecast by drug delivery method
- E. Primary packaging segmented by package format
  - 1. Ampules
  - 2. Blister packs
  - 3. Bottle
  - 4. Canisters for inhalers
  - 5. Cartridges
  - 6. IV Bags
  - 7. Mini-jars
  - 8. Pouches and strip packs
  - 9. Pre-fillable inhalers

- 10. Pre-fillable syringes
- 11. Tubes
- 12. Vials
- 13. Other
- 14. Closures
- 15. Innerseals
- 16. Projection summary
- F. Secondary packaging segmented by package type
  - 1. Folding cartons
  - 2. Blister cards and wallets
  - 3. Other
  - 4. Labels
  - 5. Shrink bands and wraps
  - 6. Projection summary
- G. Select package types segmented by packaging material
  - 1. Blister packs
  - 2. Tubes
  - 3. Pouches and strip packs
- H. Pharmaceutical packaging segmented by packaging material
  - 1. Polymer
  - 2. Glass
  - 3. Aluminum foil
  - 4. Paper
  - 5. Paperboard
  - 6. Other
- I. Pharmaceutical packaging segmented by geographic region
  - 1. Europe
  - 2. North America
  - 3. Japan
  - 4. Rest of World (ROW)
- J. Pharmaceutical packaging segmented by regulatory status
  - 1. Prescription
  - 2. OTC drugs
  - 3. Projection
- K. Packaging segmented by drug production process
  - 1. Chemical
  - 2. Biological
  - 3. Projection
- L. Pharmaceutical packaging segmented by distribution channel
  - 1. Retail
  - 2. Institutional
- M. Pharmaceutical packaging segmented by compliance
  - 1. Electronic compliance
  - 2. Standard compliance
  - 3. Projection
- N. Pharmaceutical packaging segmented by anti-counterfeiting
  - 1. Anti-counterfeit
- O. Pharmaceutical packaging segmented by child resistance
  - 1. Child resistance
  - 2. Projection
- P. Pharmaceutical packaging segmented by tamper evidence
  - 1. Tamper evidence
  - 2. Projection
